

**THE DIGITAL SOLUTION
 FOR MAINTENANCE
 AND YOUR WORKSHOP**

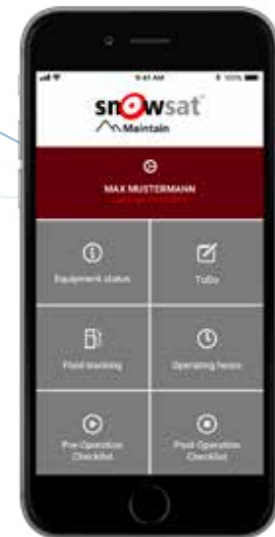

360° MAINTENANCE EASY. PRACTICAL. EFFICIENT.

Is the whole fleet and all my equipment fully operational?
What tasks are upcoming?

SNOWsat Maintain answers all your questions about
maintenance – digitally. At the same time, you organize
and streamline your operating procedures.

Our practical, intuitive, cloud-based solution tells you
everything you need to know. Clearly. In real time. By app.

So you have a clear view of everything all the time – from
administration through to maintenance of your vehicles
and your equipment. This is another innovation that grew
out of close cooperation with our clients. In the final
analysis, they always know best what's important on and
off the slopes.

APP

- Equipment status
- ToDo Management
- Checklists
- Fluid tracking
- Offline availability

01 EQUIPMENT MANAGEMENT

- Manufacturer-independent administration of all vehicles, auxiliary equipment and systems
- Traffic-light status indicator for equipment availability
- Service status display

02 TASK MANAGEMENT

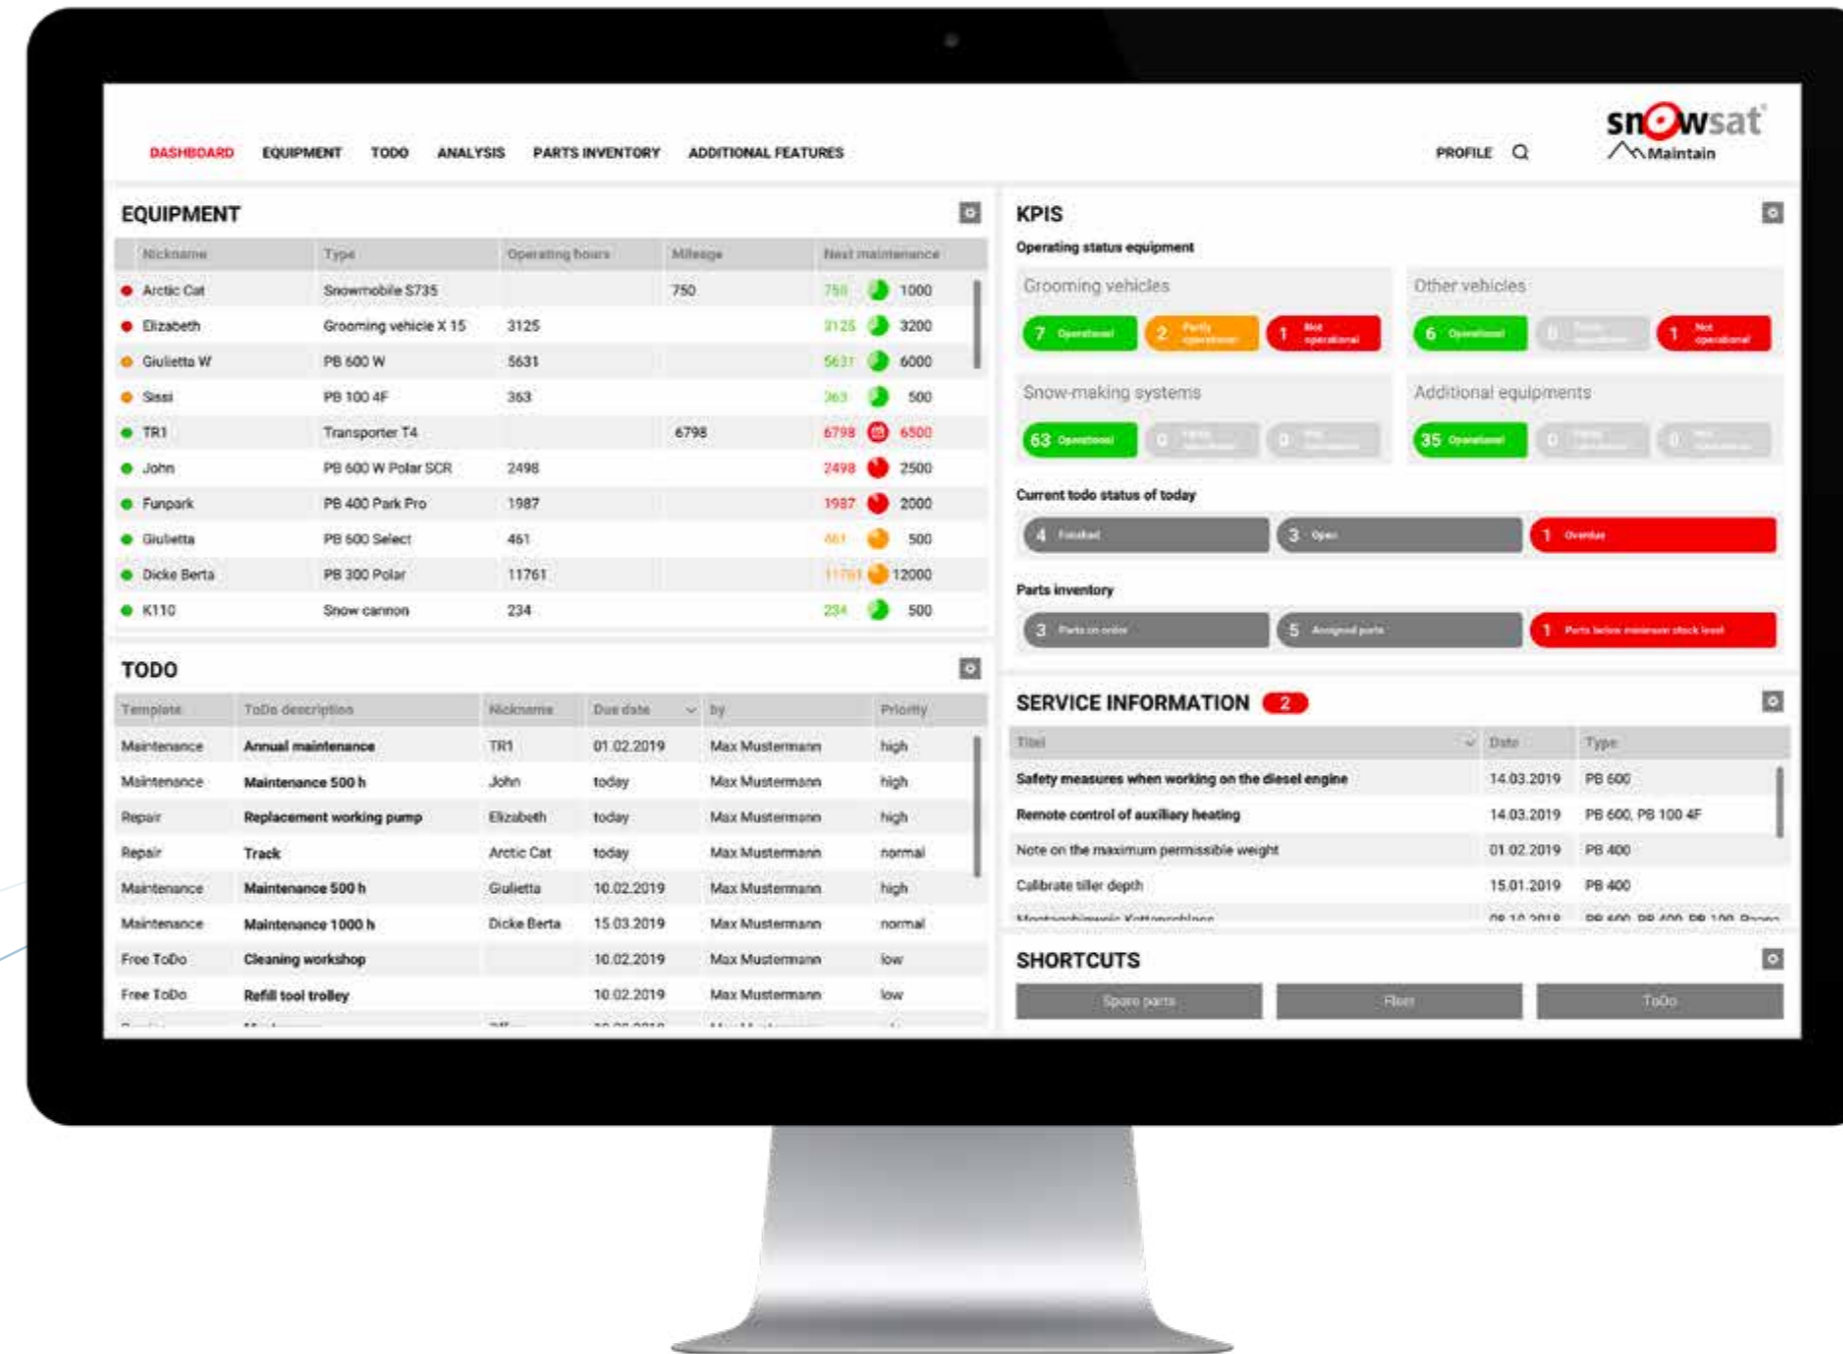

- Efficient control of all maintenance processes
- Creation, assignment, tracking and implementation of tasks (ToDo)
- Automatic actioning and feedback of customer service operations, repairs and materials procurement with Kässbohrer Geländefahrzeug AG and dealers

03 DIGITAL SERVICE RECORD

- Overview of the equipment's entire history
- Planning and control of maintenance jobs

04 MAINTENANCE SCHEDULE MANAGEMENT

- Provision of PistenBully maintenance schedules
- Creation of customer-specific maintenance schedules
